SUMMARY

Backend Engineer with 2+ years of experience building scalable SaaS platforms, REST APIs, and high-volume data processing systems using Node.js, PostgreSQL, and Redis. Experienced in designing multi-tenant architectures, ETL workflows, caching systems, and backend services that support production-scale B2B applications. Strong focus on performance optimization, transactional consistency, and clean system design.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript

Backend: Node.js, Express.js, REST APIs, Authentication, Redis

Databases: PostgreSQL, MongoDB, Redis

Concepts: System Design, Distributed Systems, ETL, Caching, Transactions

Tools: PM2, Linux, Git, Postman, Swagger, Jest

EXPERIENCE

Backend Developer | Codezee Solutions, Surat

Feb 2024 – May 2026

- Built and maintained scalable backend services for multi-tenant B2B SaaS products used by enterprise clients in the diamond and jewelry domain.
- Developed 25+ REST APIs for catalog management, user access, pricing workflows, reporting, and vendor integrations.
- Designed ETL pipelines processing 10K+ records per sync cycle from third-party APIs and SFTP sources with validation and retry handling.
- Reduced API response time by 60% through Redis caching, query indexing, and PostgreSQL join optimization.
- Implemented bulk Excel import workflows with transactional rollback and structured validation for large datasets.
- Worked on Linux server deployments, PM2 process management, and production issue debugging.

PERSONAL PROJECTS

[SplitMate](#) | Node.js, PostgreSQL, Redis, Jest

- Built an expense-sharing backend with optimized settlement calculation and Redis-backed balance caching.
- Implemented test coverage for business logic and APIs using Jest integration and unit tests.
- Integrated Redis caching for balance calculations, reducing redundant DB queries and improving read performance.

EDUCATION

B.Sc. Computer Science — VNSGU University, Surat (2022)
